Mysterious places of Saint Petersburg

1. The House of Queen of Spades

This house belonged to one of the influential women not only in Saint Petersburg but all over Europe, to Countess Nataliya Petrovna Golitsina. She was considered to be the prototype of Pushkin's Queen of Spades who owned the secret of three cards. The story of three cards was told to Pushkin by Nataliya Petrovna's great nephew. If you look at windows of the house before the dawn, you can see an old woman wagging her finger.

3. Rotonda is considered to be the most mysterious and devilish places of Saint Petersburg. They are six and five of them form a right pentagon, the satanic symbol, Bafomeet's star.

Massons met there. It was Rasputin's favourite place. It is claimed that this place has special features, such as to go out into the fourth dimension. They say that once a young man entered the basement for 15 minutes and went out as 70-year old man. After that he went crazy. Besides, there is a popular belief that if you sit on Rotonda's dead end, you can see the shadow of the seventh column, meanwhile there are only six of them.

2. The House of fulfillment of desires

Saint Petersburg is famous for its myths, ghosts as well as places where you can make a wish and it will come true.

The Krupps family lived in that house. They were not rich but once their income increased. The lamp factory thrived too. Also, a woman with two children survived during the bombing. There was a legend that those who entered the bakery with delicious smell of apple pies and other tasty smell, where the cook was Sophya, believed that they brought good luck. Some even said, "Go to Sophya, eat waffles.."

Three Unusual Museums of Saint Petersburg

The Museum of Mittens

In fact this museum is the gallery of children's creativity. All children from any family can express themselves here. Most of presented exhibits were made by children's hands. Also this museum is a place where you can help children who live in Children's Homes. In many countries mittens protect people's hands from cold. So, this item of clothing symbolizes some kind of union of fingers as well as people in the world.

When the museum was opened 500 different mittens made by children became works of art.

The museum had been located on 87 Moika Embankment before 2018. Unfortunately, the museum moved to Arkhangelskiy region.

Saint Petersburg is the cultural capital of Russia. I have been living here since my childhood. My native city never stops amazing me! For many people Saint Petersburg is bridges and museums. As for me, it is narrow streets and buildings where I spent my childhood.

For each person Saint Petersburg means something special. For ones it is the city of museums, rain and for me Saint Petersburg is the city of bridges.

Bridges can be long or short, wide or narrow but they all have distinctive features that make them unique. There are bridges that open every night like the Palace, Liteiniy, Trinity Bridges. They have amazing railings which represent fragments of old legends, myths and coat of arms. Summer night is the best time to visit bridges

because the illumination of the bridges is fantastic.
